

## Policy Statements and Strategic Objectives

### Pillar I: Food and Nutrition Security and Resilience

#### Policy statement

Ensure food and nutrition security for all through sustainable agricultural intensification, dietary diversification, improved access to land, finance and markets, and other resilience building measures.

#### Strategic Objectives

- SO.1.1: To enhance crop diversity and availability of nutritious food moving away from maize centric interventions and maximise on low entry barriers for resource-poor;
- SO.1.2: Enhance the production and consumption of micronutrient rich food;
- SO.1.3: Strengthen food safety through adequately enforced regulation of food production, processing, storage and distribution;
- SO.1.4: Raise productivity to optimal levels through climate-resilient sustainable intensification, based on restoring soil health and making optimum use of water and other natural resources that improves local genetic resources (such as small grains, pulses and legumes).
