

## Pillar III: Production and Supply of Agricultural Inputs

### Policy statement

Increase the production, supply and access of improved, modern and safe agriculture productivity-enhancing crop and livestock inputs and promote their precise utilisation, effective soil fertility management and trans-boundary pests and diseases management.

### Strategic Objectives

- SO.3.1: To develop an efficient, diverse, competitive, private-sector-led production, distribution, and marketing system;
- SO.3.2: To increase access to affordable, appropriate and safe agricultural inputs;
- SO.3.3: To improve access to finance for farmers to enhance their capacity to access adequate inputs on time, customising financing models to the specific needs of small holder and commercial farmers;
- SO.3.4: To enhance the use of agro-ecological practices such as organic agriculture in order to sustainably increase overall productivity and nutritional value of food.
