

## Pillar II: Agriculture Knowledge Technology and Innovation Systems

### Policy statement

Increase investment in agricultural research and development, technology and extension systems and adoption of climate- and business-smart technology and innovation.

### Strategic Objectives

- SO.2.1: To develop a modern, efficient and inclusive agricultural knowledge, technology, innovation and communication (exchange and dissemination) system;
- SO.2.2: To increase public and private investment in agricultural research and development, technology and extension;
- SO.2.3: To improve delivery and coordination of public and private extension services adapted to farmers' current needs.
